

Introducing Sound In Motion for iPad Version 1.1

By Sound In motion Ltd.

Tel Aviv, Israel - April 25, 2017 — Sound In Motion Ltd., a Digital Audio Software company, proudly announces the release of Version 1.1 of Sound In Motion iOS app for iPad, The first Audio for Video app on iOS, featuring a complete audio suite for iPad film makers, on Friday, 28 April 2017.

Easily add Soundboard tracks to your film project, utilizing any one of the 6 available soundboards; Footsteps, Swords, Break Stuff, Fight, Rainstorm, Vehicles.

Use the Audio Track & Wave Editor along with your sample library to trim & import any sample to your movie, this can be:

A sample imported from your computer,

A pasted sample from other audio apps using AudioCopy,

A sample recorded from the device microphone,

A sample from a purchased sound pack from the in-app store.

Users can now purchase Sound Packs within the app, from a variety of 60 high quality sound packs, ranging from 5\$ to 30\$ per pack, in various categories such as: Aviation, Background noises, Kitchen, Weapons, Cartoon, etc..

Other new features include: Cleaner and better UI, Rearrange tracks, Get Free soundboards by sharing with friends, smoother interaction with Facebook, various stability and usability improvements.
